

Hotshot

High yields fall harvest in Desert and Huron with a high quality and versatile product for the box or bulk grower/shipper

Peace of mind when planting in a period of unknown soil situations

Hotshot is a medium to large heading iceberg type. Slotted for early fall harvest in the Desert and Huron regions. With a time period that is very demanding on a variety to produce quality lettuce, and to resist Lettuce Fusarium, Hotshot is truly one of a kind in its class. Its resistance to Lettuce Fusarium Race 1 and superior Horticultural traits will give you high yields with a quality pack.

TYPE: iceberg

REGION: Huron and desert

WET DATES*:

Huron: Aug 21 – Sept 1

Desert: Sept 15 – Sept 25

COMPARISON VARIETIES:
